EASYHMIS - HIGHLIGHTS

EASYHMIS BUSINESS BENEFITS

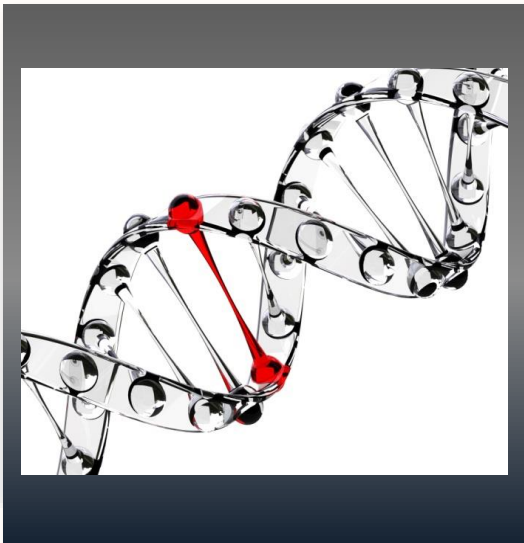

EasyHMIS from NthDimenzion ensures that your hospital workforce is able to work more effectively from an administrative standpoint. It also enables the doctors to make more accurate and informed decisions on patients as it provides complete historical data for each and every patient.

- 1 Better administrative overview
- 2 Paperless operation
- 3 Better Decision Making & Strategic planning
- 4 More visibility in Medical Audit
- 5 More effective utilization of resources, thereby cutting down the bottom line expenses
- 6 Effective Referral system
- 7 Continuity of Patient care
- 8 Better Diagnosis and Follow-up
- 9 Easy integration to third party applications
- 10 Easy Access to patient to view Clinical and Demographic details

EASYHMIS – DELIVERY MODEL

EASYHMIS – DELIVERY MODEL

EasyHMIS is available in flexible models – either on a recurring monthly fee or in a completely owned model (license based) depending on your requirements and comfort. We ensures in either scenario an ongoing support model depending on the model chosen.

- ✓ EasyHMIS is available in License Model – software is installed in your premises and an upfront license cost is payable. In addition to the license cost a fixed annual maintenance cost (AMC) would be incurred which is normally a percentage of the license fee.
- ✓ EasyHMIS is alternatively also available in a Software as a Service (SaaS) model where the software is installed in a shared / dedicated model and support is provided on an ongoing basis. There is an initial setup cost (which is charged depending on data migration efforts and minimal customization required)and an ongoing recurring monthly fee payable over a period of time.
- ✓ The Software as a Service (SaaS) model will facilitate small and medium sized hospitals to leverage the software without incurring a sizeable upfront payment. In addition it also enables them to use the software without the overheads of maintenance of the software.
- ✓ In the SaaS model generally minimal customizations would be undertaken as part of the setup / installation process. In the license model medium to large scale customizations can be undertaken at additional cost.
